# 1 Document Overview

This document serves as a training guide and support manual for dispensers of Schedule II through Schedule V controlled substances and drugs of concern in Louisiana who use Appriss Health's PMP Clearinghouse repository to report their dispensations. It includes such topics as:

- Reporting requirements for dispensers in the State of Louisiana
- Data file submission guidelines and methods
- Creating a PMP Clearinghouse account
- Creating a data file
- Uploading or reporting data
- Understanding and correcting errors

This guide is intended for use by all dispensers in the State of Louisiana required to report the dispensing of controlled substances and drugs of concern.

---

## 2 Data Collection and Tracking

### 2.1 Data Collection Overview

Act 676 of the 2006 Louisiana Legislature authorized the Louisiana Board of Pharmacy to develop, implement, and operate an electronic system for the monitoring of controlled substances and drugs of concern that are dispensed in the state or dispensed to an address within the state. The goal of the program is to improve the state's ability to identify and inhibit the diversion of controlled substances and drugs of concern in an efficient and cost-effective manner that shall not impede the appropriate utilization of these drugs for legitimate medical purposes.

Information about controlled substance dispensing activities is reported at regular intervals to the state of Louisiana through the authorized data collection vendor, Appriss, Inc. Pharmacies and other dispensers are required by law to provide such reporting to the data collection vendor in approved formats and frequencies. This includes mail order pharmacies that mail orders into the state.

### 2.2 Reporting Requirements

All controlled substance prescriptions (Schedules II, III, IV, and V) as well as prescriptions for drugs of concern must be submitted no later than the next business day after the date of dispensing. Louisiana drugs of concern are any material, compound, mixture, or preparation containing any quantity of the following substances: naloxone, gabapentin, butalbital, and promethazine in oral liquid formulations.

The laws and regulations for reporting to the LA Prescription Monitoring Program (PMP) are continuously subjected to amendments. It is the responsibility of dispensers to be aware of such updates as they are enacted and promulgated.

All dispensers of Schedule II–V controlled substance prescriptions and/or drugs of concern are required to collect and report their dispensing information. Such reporting without individual authorization by the patient is allowed under HIPAA, 45CFR § 164.512, paragraphs (a) and (d).

If you are a chain pharmacy, your data will likely be submitted from your home office. Please verify this with your home office. If you are an independent pharmacy or other entity, please forward the reporting requirements to your software vendor. They will need to create the data file, and they may be able to submit the data on your behalf. If not, follow the instructions provided in the [Data Submission](#) chapter to submit the data.

Exemptions to the reporting requirements outlined above may be granted in some circumstances. Refer to [Appendix C – Exemptions](#) to Reporting for details about gaining exemption status.

## 3 Accessing Clearinghouse

This chapter describes how to create your PMP Clearinghouse account and how to log in to the PMP Clearinghouse web portal.

### 3.1 Creating Your Account

Prior to submitting data, you must create an account. **If you are currently registered with the Appriss PMP Clearinghouse system, you *do not* need to register for a new account—you will be able to add Louisiana to your existing account for data submissions.** If you have an existing PMP Clearinghouse account, please refer to [Adding States to Your Upload Account](#) to add states to your account.

**Notes:**

- *Data from multiple pharmacies can be uploaded in the same file. For example, chain pharmacies may send in one file containing controlled substance dispensing information for all their pharmacies licensed in the State of Louisiana. Therefore, chains with multiple stores need only to set up one account to upload a file.*
- *PMP Clearinghouse allows users to submit data through the web portal via manual entry (UCF) or upload of ASAP files. For users who prefer an encrypted transfer method, SFTP access is also available. You may set up your SFTP account during the account creation process.*
- *If you need to make changes to an existing PMP Clearinghouse upload account, please refer to [Managing Your Upload Account](#).*

Perform the following steps to create an account:

1. Open an internet browser window and navigate to the PMP Clearinghouse Account Registration page located at <https://pmpclearinghouse.net/registrations/new>.

## 4 Data Submission

This chapter provides information and instructions for submitting data to the PMP Clearinghouse repository.

### 4.1 Timeline and Requirements

- Pharmacies and software vendors can establish submission accounts upon receipt of this guide. See [Creating Your Account](#) for more information.
- You can begin submitting data to PMP Clearinghouse as soon as your account has been created.
- As of June 6, 2016, dispensers are required to transmit their data using PMP Clearinghouse in accordance with the guidelines outlined under [Reporting Requirements](#).
- If a pharmacy does not dispense any controlled substances or drugs of concern for the preceding reporting period, it must file a zero report for that reporting period or it will be considered noncompliant. See [Zero Reports](#) for additional details.

### 4.2 Upload Specifications

Files should be in the ASAP 4.2 format as defined in [Appendix A: ASAP 4.2 Specifications](#). Files for upload should be named in a unique fashion, with a prefix constructed from the date (YYYYMMDD) and a suffix of “.dat”. An example file name would be “20180906.dat”. All of your upload files will be kept separate from the files of others.

Reports for multiple dispensers/pharmacies can be in the same upload file in any order.

Prescription information must be reported no later than the next business day after the day of dispensing.

### 4.3 Zero Reports

If you have no dispensations to report for the preceding reporting period, you must report this information to the LA PMP.

You may submit your zero report through the PMP Clearinghouse web portal by following the steps below or via SFTP using the ASAP Standard for Zero Reports. For additional details on submitting via SFTP, please refer to [Appendix B: ASAP Zero Report Specifications](#).

You may submit zero reports through the PMP Clearinghouse web portal using one of the following methods:

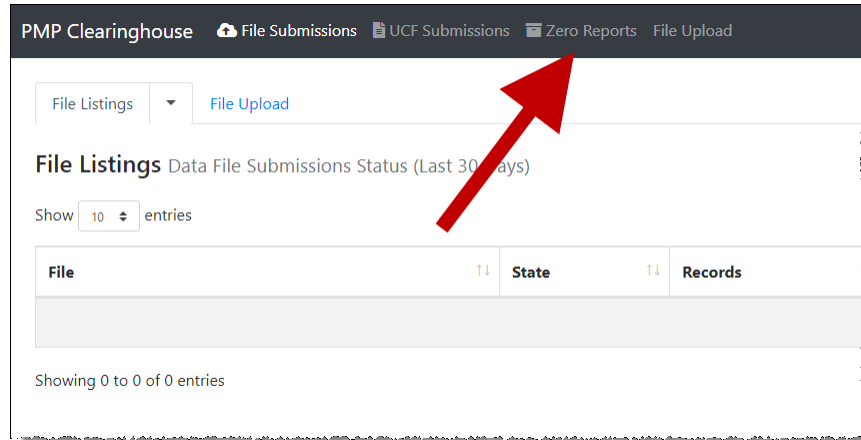

- [Submit a single-click zero report](#)
- [Create a new zero report](#)

### 4.3.1 Submit a Single-Click Zero Report

Single-click zero reporting allows you to create a profile for the pharmacy that includes its identifiers (e.g., DEA, NPI, NCPDP), so you do not have to enter it each time you submit a zero report.

To create a pharmacy profile and begin submitting single-click zero reports:

1. If you do not have an account, perform the steps in [Creating Your Account](#).
2. [Log in to PMP Clearinghouse](#).
3. Click **Zero Reports**.

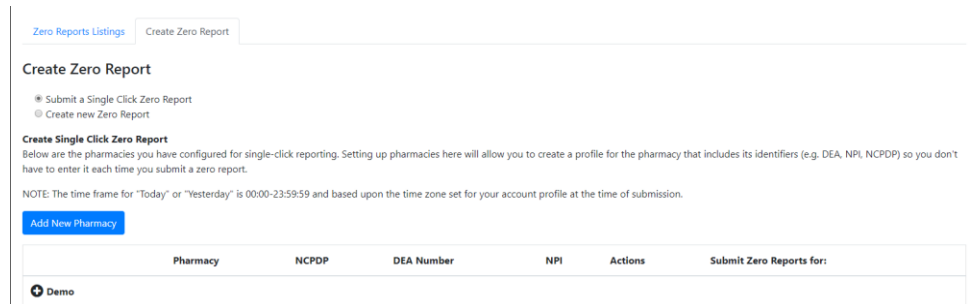

The Zero Report Listings page is displayed.

A screenshot of the 'Zero Reports Listings' page. It features a 'Create Zero Report' button and a 'Show 25 entries' dropdown. Below is a table with columns: Account, State, Start Date, End Date, NCPDP, DEA, NPI, ASAP File, and Date Submitted. Two entries are visible, both for state 'AL' and date '01/16/2020'.

The New Pharmacy page is displayed.

6. Select the PMP for which you are submitting a zero report from the drop-down list in the **PMP** field.
7. Enter the pharmacy's name in the **Pharmacy** field.
8. Populate the **NCPDP**, **DEA Number**, and/or **NPI** fields as required by the PMP you selected in step 6. If any of these fields are required, a red asterisk (\*) will be displayed next to that field once you have selected a PMP.
9. Click **Save**.

The pharmacy is saved and will be listed under the drop-down for the selected PMP, which is located at the bottom of the page.

10. Click the plus sign (“+”) next to the PMP for which you wish to submit a zero report.  
The list of pharmacies you have configured for single-click zero reporting for that PMP is displayed. *Note that this page allows you to submit a zero report for the current date (Today) or the previous day (Yesterday).*

## 5 Data Delivery Methods

This chapter provides information about data delivery methods you can use to upload your controlled substance reporting data file(s) to PMP Clearinghouse.

For quick reference, you may click the desired hyperlink in the following table to view the step-by-step instructions for your chosen data delivery method:

Delivery Method	Page
<a href="#">Secure FTP</a>	15
<a href="#">Web Portal Upload</a>	16
<a href="#">Manual Entry (UCF)</a>	18

### 5.1 Secure FTP

If you are submitting data to PMP Clearinghouse using SFTP, you must configure individual sub-folders for the state PMP systems to which you are submitting data. These sub-folders must be created in the *homedir/directory* folder, which is where you are directed once authenticated, and **should be named using the state abbreviation (e.g., LA, AL, AK, KS, GA, etc.)**. Data files not submitted to a state sub-folder will be required to have a manual state PMP assignment made on the [File Listings](#) page. Please refer to [State Subfolders](#) for additional details on this process.

1. If you do not have a PMP Clearinghouse account, perform the steps in [Creating Your Account](#).
- Or
2. If you have a PMP Clearinghouse account but have not enabled SFTP access, perform the steps in [Adding SFTP Access to an Upload Account](#).
3. Prepare the data file(s) for submission, using the ASAP specifications described in [Appendix A: ASAP 4.2 Specifications](#).

**Notes:**

- Files for upload should be named in a unique fashion, with a prefix constructed from the date of submission to PMP Clearinghouse (YYYYMMDD) and a suffix of ".dat". An example file name would be "20180919.dat".
- All of your upload files will be kept separate from the files of others.
- Reports for multiple pharmacies can be in the same upload file in any order.
- If you submit more than one file within the same day, you must uniquely name each file, so the system does not overwrite existing uploaded files. For example, if uploading three files within the same day, you could use the following file names: 20180919a.dat, 20180919b.dat, and 20180919c.dat.

4. SFTP the file to <sftp://sftp.pmpclearinghouse.net>.
5. When prompted, enter the username and password you created when setting up the SFTP account.
6. Place the file in the appropriate state-abbreviated directory.

7. You can view the results of the transfer/upload on the Submissions page in PMP Clearinghouse.

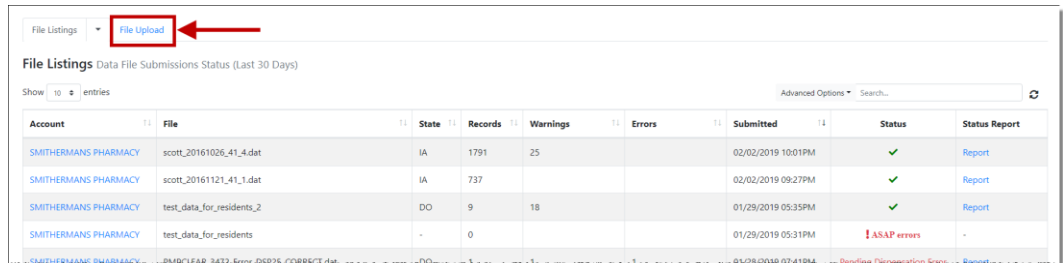

**Note:** If you place the data file in the root directory and not a state sub-folder, a “**Determine PMP**” error is displayed on the File Status page, and you will be prompted to select a destination PMP (state) to which the data should be sent.

## 5.2 Web Portal Upload

1. If you do not have an account, perform the steps in [Creating Your Account](#).
2. Prepare the data file(s) for submission, using the ASAP specifications described in [Appendix A: ASAP 4.2 Specifications](#).

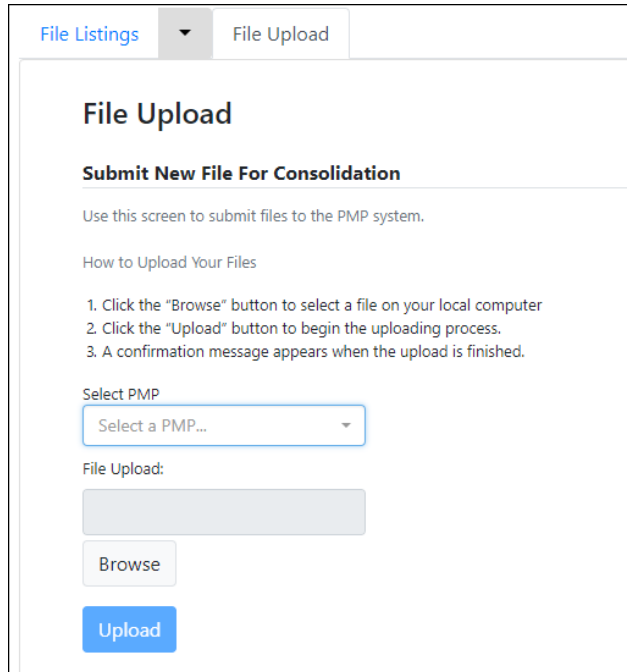

### Notes:

- Files for upload should be named in a unique fashion, with a prefix constructed from the date of submission to PMP Clearinghouse (YYYYMMDD) and a suffix of “.dat”. An example file name would be “20180919.dat”.
  - All of your upload files will be kept separate from the files of others.
  - Reports for multiple pharmacies can be in the same upload file in any order.
  - If you submit more than one file within the same day, you must uniquely name each file, so the system does not overwrite existing uploaded files. For example, if uploading three files within the same day, you could use the following file names: 20180919a.dat, 20180919b.dat, and 20180919c.dat.
3. [Log in to PMP Clearinghouse](#).
  4. From the home page, click the **File Upload** tab.

A message is displayed prompting you to confirm the submission.

8. Click **Upload** to continue with the file submission.

Your file is uploaded, and you can view the results of the upload on the File Listings page.

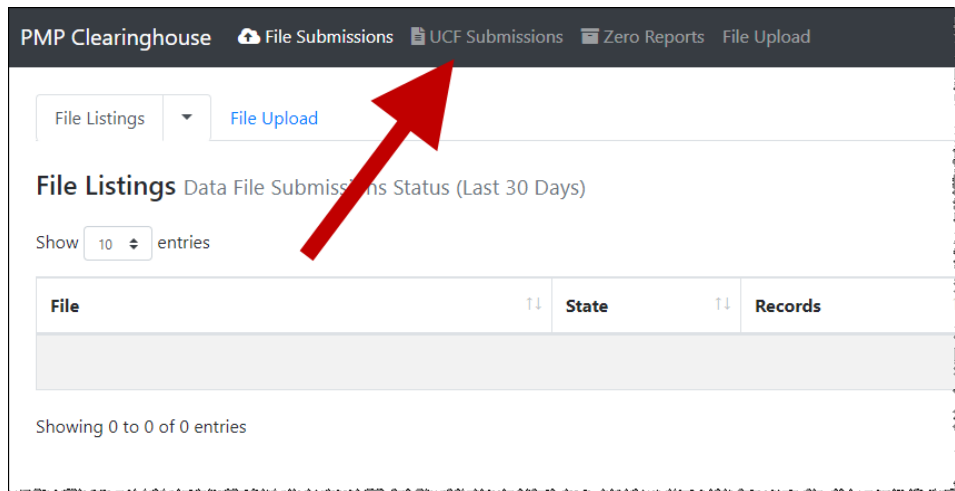

**Note:** When uploading a file, the file name must be unique. If the file name is not unique, a message is displayed indicating that the file name has already been taken.

## 5.3 Manual Entry (UCF)

You can manually enter your prescription information into the PMP Clearinghouse system using the Universal Claim Form (UCF) within the PMP Clearinghouse web portal. This form allows you to enter patient, prescriber, dispenser, and prescription information.

Please refer to [Reporting Requirements](#) for the complete list of reporting requirements.

## 6 Data Compliance

This chapter describes how to view the status of your submitted data files and how to correct errors.

### 6.1 File Listings

The File Listings page displays information extracted from the data files submitted to PMP Clearinghouse, including the file name, number of records identified within the data file, number of records that contain warnings, number of records that contain errors, and the date and time of submission. The File Listings page is displayed upon logging in to Clearinghouse; you may also click **File Submissions** from the menu at any time to access this page.

You may sort the File Listings page by account name, file name, state, number of records, warning count, error count, and date submitted. You may also click the account name to display the account details.

- The **Status** column, located at the end of each row, displays the file status.
- The **Status Report** column, located next to the **Status** column, contains a link to the status report for that file. Please refer to [File Status Report](#) for more information on how to read and interpret this report.

If a file contains errors, it will have a status of **“Pending Dispensation Error.”** You can click the error message in the **Status** column to display the Error Correction page, which allows you to view the records containing errors (see [View Records](#) for more information). Please refer to [Error Correction](#) for instructions on how to correct errors.

If a file is unable to be parsed into the PMP Clearinghouse application, it will have a status of **“ASAP Errors.”** To correct these errors, a new file must be submitted to PMP Clearinghouse. It is not necessary to void a file that failed parsing since it was not successfully submitted to PMP Clearinghouse.

If you submitted a file via SFTP without using a state-specific sub-folder, the file will be displayed, and you will be prompted to select a destination PMP to which the data file will be transferred.

## 6.2 UCF Listings

The UCF Listings page displays information about the UCFs submitted to PMP Clearinghouse, including the number of warnings and errors. Click **UCF Submissions** to access this page.

You may sort the UCF Listings page date created, state, warning count, error count, and status.

Created at	State	Warnings	Errors	Status
01/15/2019 02:13 PM	KS	0	0	✓

01/28/2019 04:07 PM	CR	0	0	✓
01/28/2019 04:11 PM	CR	0	0	✓

The **Status** column, located at the end of each row, displays the UCF's status. Data entered into the UCF is validated upon submission; therefore, successfully submitted UCFs should not contain errors. However, if you have attempted to submit a UCF with errors and did not immediately correct those errors and submit the record, you have 30 days to make updates to these records in Clearinghouse.

1. To view pending or incomplete submissions, click the **Manage Claim Forms** tab on the UCF Listings page.

The Edit Universal Claim Form page is displayed.

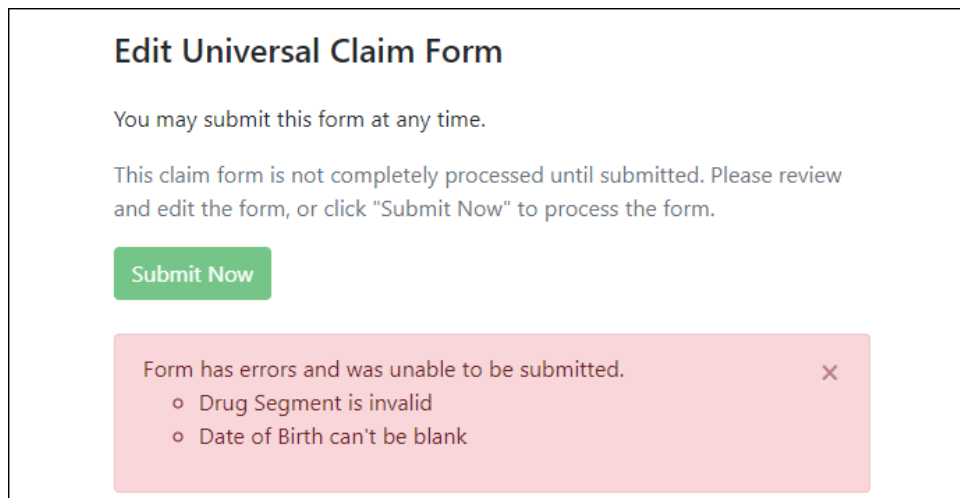

3. Make the necessary corrections or changes, and then click **Submit Now**, located at the top of the page.

A message is displayed prompting you to confirm the data submission.

4. Click **OK**.

Your data will be validated upon submission. If there are any remaining errors on the UCF form, they are displayed at the top of the page.

**Note:** If there are no errors, you are returned to the Submitted Claim Forms page and your report is listed there.

5. Correct the indicated errors, then repeat steps 3-4.
6. Once your data has been successfully submitted, your report is listed on the UCF Listings page.

## 6.3 Error Correction Page

### 6.3.1 View Records with Errors

The Error Correction page displays more information about the records within a selected data file that need correcting, including **Prescription Number**, **Segment Type**, **Warning Count**, and **Error Count**. To access this page, click the **“Pending Dispensation Error”** message in the **Status** column of the [File Listings](#) page.

DEA Number	NCPDP Identifier	Prescription Number	Name	Filled At	Segment Type	Warning Count	Error Count
BM4601616		ERROR_DSP25_CORRECT	MEDICINE SHOPPE	2019-01-27	Patient	0	1

The **Correct** button, located at the end of each row, allows you to make corrections to the record.

### 6.3.2 Error Correction via PMP Clearinghouse

Once you click Correct on the Error Correction page, the Errors page is displayed. This page displays detailed information about the records within a selected data file that need correcting, including all the fields contained within the record and the originally submitted value, and allows you to correct those records.

Field	Submitted Value	Corrected Value	Messages
National provider identifier	1104923507	1104923507	✓
NCPDP identifier	0068568	0068568	✓
DEA number	BE9432042	BE9432042	<b>Warnings:</b> DEA number warning: DEA number not found in registry.
Name	<input type="text"/>		<b>Errors:</b> Name value must be present.
Phone number	4017704455	4017704455	✓

- The **Corrected Value** column allows you to enter a new value to correct the error.
- The **Message** column displays the relevant error message explaining why the value entered in that field did not pass the validation rules.

**For files that failed to parse, the error identified is "best effort" and any information we could not parse is listed as "unparseable" in the file. In this case, you must submit a corrected file.**

**To correct records:**

1. Identify the fields that require corrections. Fields containing errors are highlighted in red, as shown in the screenshot above.
2. Enter the corrected value in the **Corrected Value** column.
3. Click **Submit**.

The error is processed through the validation rules.

- a. If the changes pass the validation rules, the record is valid, and a message is displayed indicating that the errors have been corrected. The [File Listings](#) and [Error Correction](#) pages are also updated.
- b. If the changes fail the validation rules, a message is displayed indicating that there was a problem correcting the errors, and the **Message** column is updated with any new error message. Repeat steps 2–3 until the errors have been corrected and the file can be successfully submitted.

### 6.3.3 Error Correction via File Submission

The ASAP 4.2 standard requires a pharmacy to select an indicator in the **DSP01** (Reporting Status) field. These indicators allow you to submit new records, revise and resubmit records, and void (delete) erroneous records. These actions are indicated by supplying one of the following values in the **DSP01** field:

- **00 New Record** – indicates a new record
- **01 Revise** – indicates that one or more data elements in a previously-submitted record have been revised
- **02 Void** – indicates that the original record should be removed

## 7 Email Reports

Email status reports are automatically sent to all users associated with a specific data submitter account. These reports are used to identify errors in files that have been submitted and to confirm zero report submissions. This chapter describes the status reports you may receive via email.

### 7.1 File Failed Report

You will receive the *File Failed Report* if a submitted file was not able to be parsed and was not processed into PMP Clearinghouse. The report contains a description of the error encountered within the file. In the event of a failed file, a new file should be submitted with the necessary corrections.

**Note:** Failed files are not parsed into Clearinghouse and do not require a voided ASAP file to remove it from the system.

An example *File Failed Report* is provided below.

```
SUBJ: Louisiana ASAP file: fake-test3.txt - Parse Failure

BODY:
Error Message
-----
-----
Failed to decode the value '04' for the bean id
'transactionControlType'.

Summary:
* File Name: fake-test3.txt
* ASAP Version: 4.2
* Transaction Control Number: unparseable
* Transaction Control Type: unparseable
* Date of Submission: September 19, 2018

NOTE: This file could not be received into the system because the
system could not recognize its content as a valid ASAP format.
Action is required to resolve the issues and a subsequent file
should be submitted. As such the information provided in this
report is "best effort" and any information we could not parse is
listed as "unparseable" in the fields above.
```

### 7.2 File Status Report

The *File Status Report* serves as notification that a data file is currently being parsed by the state PMP system.

This report identifies specific records in the submitted data file and returns identifying information about the record, including specific errors identified during the validation process. It uses fixed-width columns and contains a summary section after the error listings. Each column contains a blank two-digit pad at the end of the data.

The columns are set to the following lengths:

Column	Length
DEA	11 (9 + pad)
NCPDP	9 (7 + pad)
NPI	12 (10 + pad)
Prescription	27 (25 + pad)
Filled	10 (8 + pad)
Segment	18 (16 + pad)
Field	18 (16 + pad)
Type	9 (7 + pad)
Message	Arbitrary

The *File Status Report* notifies you of the following scenarios:

- **Total records:** The total number of records contained in the submitted data file.
- **Duplicate records:** The number of records that were identified as already existing within the PMP system. Duplicate records are not imported to prevent improper patient information.
- **Records in process:** The number of records remaining to be processed into the system (usually only displays a number if the file has not finished loading at the time the report is sent out).

*Note: Records remaining to be processed will continue to be processed even after the status report is sent.*

- **Records with errors:** The number of records that contain errors. These errors must be corrected for the record to be imported into the system. If a zero (0) is displayed, there are no errors in the data. Please refer to [Error Correction](#) for instructions on correcting errors.
- **Records with warnings:** The number of records that contain warnings. These warnings do not need to be corrected for the record to be imported into the system. If a zero (0) is displayed, there are no warnings in the data.
- **Records imported with warnings:** The number of records with warnings that were imported. If a record contains both warnings and errors, the errors must be corrected to be submitted to the system. Please refer to [Error Correction](#) for instructions on correcting errors.
- **Records imported without warnings:** The number of records without warnings that were imported.

*Note: The initial File Status Report is sent out two (2) hours after the file has been submitted to the system. Additional reports will be sent out every 24 hours if errors continue to be identified within a submitted data file.*

An example *File Status Report* is provided on the following page.

SUBJ: Louisiana ASAP file: fake-test3.txt - Status Report

You will receive a *Zero Report Confirmation* after successfully submitting a zero report to PMP Clearinghouse. This report displays the state PMP to which the zero report was submitted, date range for the zero report, date the zero report was submitted to PMP Clearinghouse, and date the report was originally created.

## 8 Managing Your Upload Account

The **Account** menu option allows you to manage the information associated with your organization's upload account, including adding users, states, and SFTP access to your account as well as editing your organization's account information.

**Note:** This chapter contains information for managing the upload account with which your user account is associated. For information about editing and managing your individual user account, including how to change your password, please refer to [Managing Your User Profile](#).

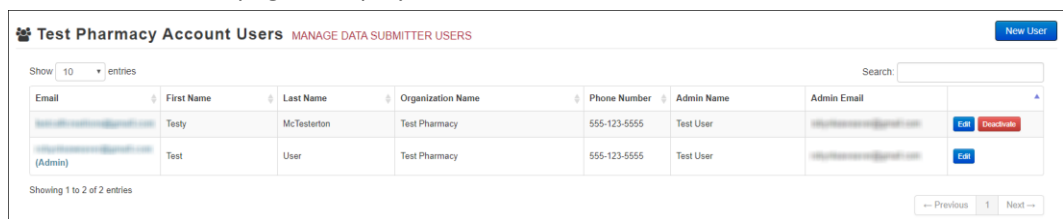

### 8.1 Adding Users to Your Upload Account

PMP Clearinghouse allows data submitters to add new users to the system who have the same rights and access to submitting data and viewing file status. This practice allows you to create an account to be used for a backup individual.

1. [Log in to PMP Clearinghouse](#).
2. Click **Account**.

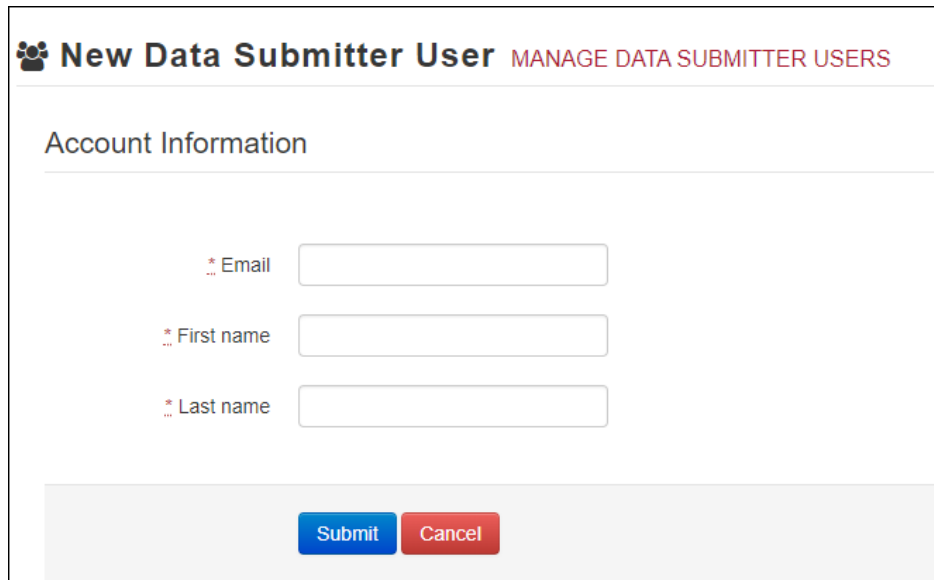

3. Select **Users** from the **Account** drop-down menu.  
The Account Users page is displayed.

A screenshot of the 'Test Pharmacy Account Users' page. The page title is 'Test Pharmacy Account Users' with a sub-header 'MANAGE DATA SUBMITTER USERS' and a 'New User' button in the top right corner. Below the title, there is a 'Show 10 entries' dropdown and a search input field. The main content is a table with the following columns: Email, First Name, Last Name, Organization Name, Phone Number, Admin Name, and Admin Email. There are two rows of user data. The first row has 'Testy' as the first name and 'McTesterton' as the last name. The second row has 'Test' as the first name and 'User' as the last name. Both rows have 'Test Pharmacy' as the organization name and '555-123-5555' as the phone number. The 'Admin Name' column contains 'Test User' for both. The 'Admin Email' column contains a placeholder email address. There are 'Edit' and 'Delete' buttons for each row. At the bottom left, it says 'Showing 1 to 2 of 2 entries'. At the bottom right, there are 'Previous', '1', and 'Next' navigation buttons.

4. Click **New User**, located in the top right corner of the page.

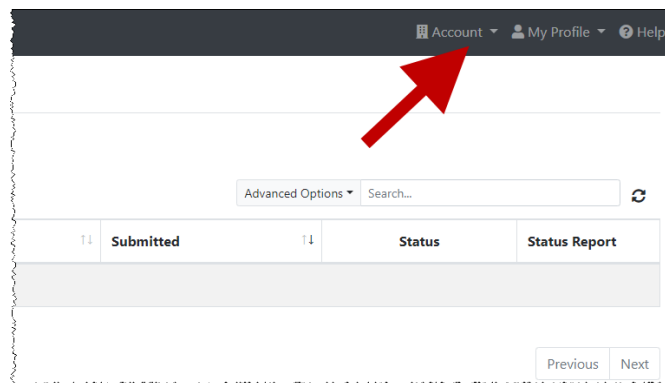

The New Data Submitter User page is displayed.

5. Enter the new data submitter's email address, first name, and last name in the appropriate fields. *Note that all fields are required.*
6. Click **Submit**.  
The user is added to the list of data submitters for your organization, and you are returned to the Account Users page.
7. Please inform the new user of the account creation.
  - a. The user will receive an email with a link for them to confirm their account.
  - b. Once the account has been confirmed, the user will need to navigate to the PMP Clearinghouse Login page and click **Forgot your password?** to create a password for their account and log in.
  - c. Upon logging in, the user will be able to view all files submitted for your organization's upload account.

### 8.1.1 Changing Another User's Password

## 8.2 Adding States to Your Upload Account

If your organization needs to submit data files to an additional state that uses PMP AWARxE, you can submit the request through PMP Clearinghouse.

1. [Log in to PMP Clearinghouse.](#)
2. Click **Account**.

3. Select **Multi State Approval** from the **Account** drop-down menu.  
The Multi State Approval page is displayed. This page displays all states currently using the PMP AWARxE system as well as your data sharing status with each state.

4. To request to submit data to another state, click to select the checkbox next to that state.

PMP Clearinghouse automatically saves your changes, and your request is submitted to the state's PMP administrator for review and approval. Once the request has been approved, the status for that state will change from "Pending" to "Approved," and you may begin submitting data to that state's PMP.

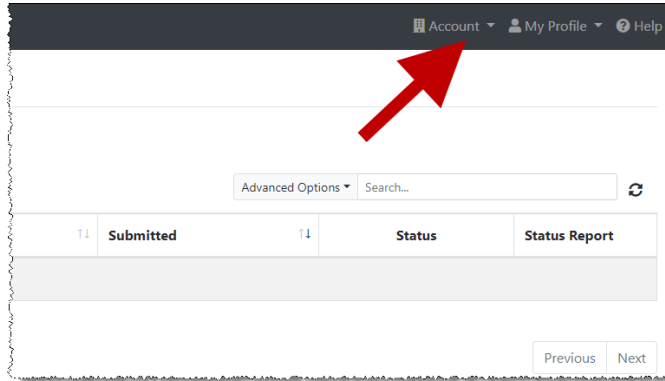

### Notes:

- If you are submitting data via SFTP, the file must be located in the proper sub-folder to ensure delivery to the desired state PMP.
- To cancel data submission to a state's PMP, uncheck the box for that state. Note that if you need to submit data to that state again in the future, you will have to go through the approval process again.

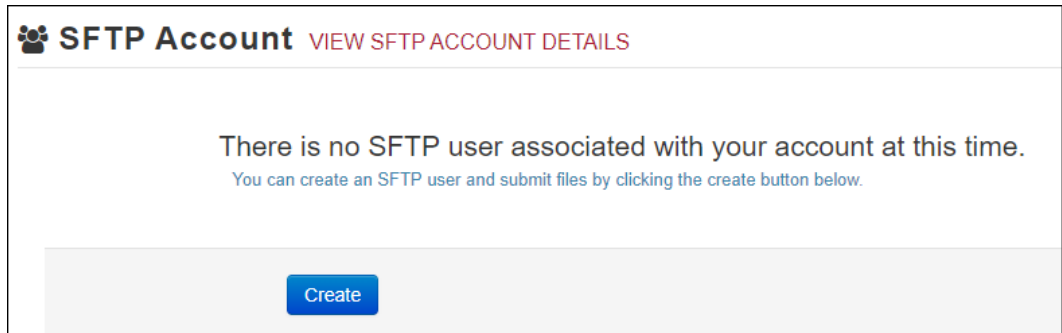

## 8.3 Adding SFTP Access to an Upload Account

If a registered upload account did not request an SFTP account during the account creation process, you can request one at any time using the **Account** menu option.

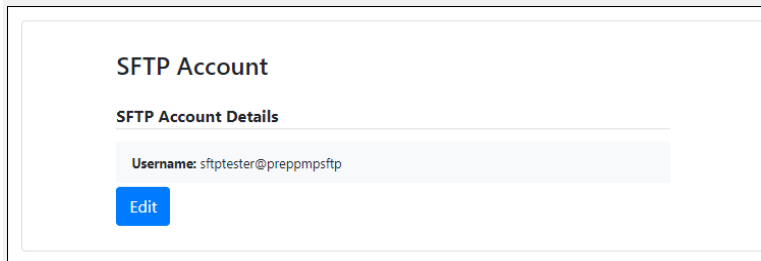

1. [Log in to PMP Clearinghouse](#).
2. Click **Account**.

3. Select **SFTP Details**.  
The SFTP Account page is displayed.

**Note:** If an SFTP account already exists for the upload account, the username is displayed on the SFTP Account page.

Once the account has been successfully created, this password will be input into the pharmacy software so that submissions can be automated.

**Notes:**

- This password can be the same as the one used when the upload account was created.
- Unlike your Profile password (i.e., your user account password), the SFTP password does not expire.
- The URL to connect via SFTP is [sftp://sftp.pmpclearinghouse.net](ftp://sftp.pmpclearinghouse.net).

## Appendix A: ASAP 4.2 Specifications

The information on the following pages contains the definitions for the specific contents required of uploaded records in the American Society for Automation in Pharmacy (ASAP) format to comply with the LA PMP requirements.

The following elements are used in each upload file:

- **Segment Identifier** – indicates the beginning of a new segment, for example, *PHA*.
- **Data Delimiter** – character used to separate segments and the data elements within a segment, for example, an asterisk (\*).

Each completed field should be followed by an asterisk, and each blank field should contain a single asterisk.

If the last field in the segment is blank, it should contain an asterisk and a tilde (~).

- **Segment Terminator** – character used to mark the end of a segment, for example, the tilde (~).

**Note:** Field TH09 in the Transaction Header segment contains a built-in segment terminator. Since TH09 also signifies the end of the segment, it should contain two tildes (~~).

- **Requirement**
  - R = Required by the LA PMP
  - N = Not required but accepted if submitted
  - S = Situational

**Note:** For more information, contact the American Society for Automation in Pharmacy for the full Implementation Guide for the ASAP Standard for Prescription-Monitoring Programs. This guide includes field lengths, acceptable attributes, and examples.

**Note:** Submitting data via SFTP requires that you have an existing PMP Clearinghouse account with SFTP access.

- If you need to create a PMP Clearinghouse account, please refer to [Creating Your Account](#). You will be able to set up your SFTP account during the account creation process.
- If you have an existing PMP Clearinghouse account but do not have SFTP access, please refer to [Adding SFTP Access to an Upload Account](#).

## SFTP Connection Details

**Hostname:** *sftp.pmpclearinghouse.net*

Appriss recommends that you use the hostname when configuring the connection rather than the IP address, as the IP address is subject to change.

**Port:** 22

**Note:** The port will always be 22.

- **Credentials:** Your SFTP account credentials (username and password) can be found within the PMP Clearinghouse website. To locate your credentials, [log in to PMP Clearinghouse](#), then click **Account > SFTP Details > Edit**.
- Your username cannot be modified; however, you can update your password.

**Note:** Your current SFTP password cannot be seen or recovered. If you have forgotten or lost it, you will need to create a new one. For more information on changing the SFTP password, please refer to [Adding SFTP Access to an Upload Account](#).

- **Once you have established SFTP access, you can test the SFTP connection, but you will not be able to submit data to a PMP until your account has been approved by the state PMP administrator.**

## State Subfolders

PMP Clearinghouse is the data repository for several states. As such, data submitted via SFTP must be placed in the appropriate folder for the state for which you are submitting data so that it can be properly imported to that state. The creation of subfolders must be done outside of the PMP Clearinghouse website using third-party software, such as an SSH client or a command line utility. Files placed in the root/home directory of the SFTP server will not be imported, as this will cause the dispensing entity to appear as noncompliant/delinquent.

Your pharmacy software will need to be configured to place files in the appropriate state folder when submitting. You may need to contact your software vendor for additional assistance with this process.

**NOTE:** Capitalization of the abbreviated state folders' names has no bearing on whether or not Clearinghouse processes the files; however, some pharmacy systems, especially \*nix-based systems, will require that the exact case is used when specifying the target folder.

There are two methods by which to create state subfolders for SFTP submissions:

1. **Via SSH client** (e.g., WinSCP, FileZilla, etc.)
  - a. Log in to your SFTP account.
  - b. Create the required directories under **/homedir**.

## 2. Via command prompt

- a. Log in to your SFTP account using command prompt.
- b. Type “**mkdir**” followed by a space and then the state abbreviation you are using (e.g., **mkdir PR**).

**NOTE:** The state folder must be titled with the two-letter abbreviation as specified above.

## Public (SSH/RSA) Key Authentication

PMP Clearinghouse supports SSH key authentication. The generation of the key is outside the scope of this document; however, general guidelines about the key, along with how to import/load it, are provided below.

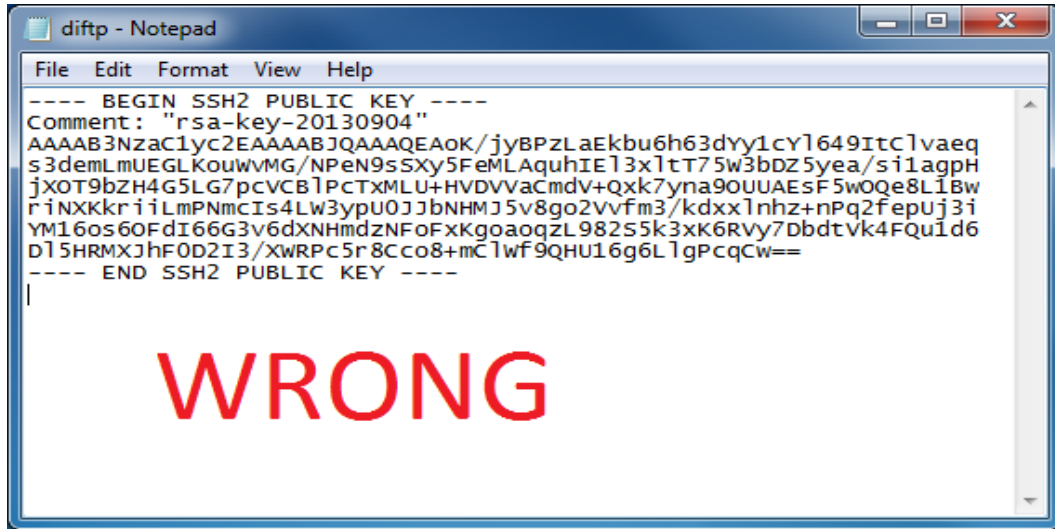

**Note:** *PGP Encryption is not supported.*

- **Supported Key Types:**
  - SSH-2 RSA 2048 bit length
- **Unsupported Key Types:**
  - SSH-1 RSA
  - SSH-2 DSA
- **Correct Public Key Format:** If opened in a text editor, the key should look like the screenshot below.

- **Incorrect Public Key Format:** If opened in a text editor, the key SHOULD NOT look like the screenshot below.

- Once the key has been generated, it should be named “**authorized\_keys**”.

**Notes:**

- *There is no file extension.*
- *There is an underscore between the words **authorized** and **keys**.*
- A `.ssh` subfolder needs to be created in the SFTP account’s home directory. The “**authorized\_keys**” file must be placed in the `.ssh` folder. The creation of this folder follows the same process as creating a state subfolder. Please refer to [State Subfolders](#) for steps on creating subfolders.
